MAER *Charme*
semipreciousstones handmade

Part of the nature's repertoire, these stones are exceptional raw masterpieces, admired and appreciated since ancient times have been classified by their gems under the renowned name of semiprecious stones.

Created in nature's mysterious laboratories, over many thousand years, these stones are just one of the source from where the absolute beauty originated. Their structure is a perfect architecture of small crystals coming in an infinite array of colors and depths. These semiprecious stones expressing the essence of elegance, class and beauty are the ultimate touch of perfection for any interior, from classic to modern, from romantic to contemporary...

Touches of gold and silver, a large choice of textures and colors expand and enhance their ability to fit any interior or design.

We can create unique, exclusive pieces with any dimensions and also a variety of applications including kitchen & bathroom surfaces, work surfaces, counter tops, floors, walls, furniture, special features and more.

We pride ourselves in the fact that all our products are handmade and possibility of our client to supervise the manufacturing process. This way we are sure that MAER Charme quality and design will exceed your expectations and you will establish a personal relationship with the product.

LUKS LINE

Hammering out pieces made of semiprecious stones that should satisfy the lofty aesthetic rigour and emulate the expectations of our customers, working towards seeing this alongside architects and designers whose perspectives converge in gentle exigency and austere subtlety, during a continuance consisting of fourteen years of labouring, we have reached a point from where the next step dictates the launching of our own lines of fournitures, to the realization of which contribution is being yielded by architects Intrinsic to us and by our Romanian factories.

GO *Coffee Table*

The whole is the truth. The line, isolated within a sole segment, seeks out for branching with another, that will have served not only towards its dilatation and prolongation but towards the fulfillment of a different whole that should emphasize, inside the penumbra of its own completion, the particular of the petrified wood that comprises every element. Difference being situated amidst two repetitions, the blocks join up not only to lose their own identity at the behalf of the totality but to accentuate their own core illumed by the gold that lays latent inside the whole. It is the perpetual game that which engages and disguises intermittently the modern qualities of the table, the movement towards dynamic harmonization, disseminated by the emergence of the part for the crowning of the whole, and its disappearance in the unitary body that preserves encapsulated the fragmentary delicacy.

LIGHT&CLEAR

COLLECTION

LIGHT&CLEAR Collection is the result of more than 2 years of continuous research for our mixed team of Romanian and Italian engineers and designers and represents our passion for beautiful and high technology.

0% deformation after 140 celsius degrees (284 Fahrenheit) 24hrs continuous exposure. Special quality materials are used in order to assure maximum UV resistance, with special color development in MAER laboratories (Blue Agathe color is 100% result of MAER laboratories research). We deliver various product dimensions, with a maximum of 150x300cm / 59,05 x118,110 inch or "cut to size" Minimum thickness is 6mm, the weight for this thickness being 16.5Kg/sqm while at the standard 2cm thickness the weight is 55Kg/sqm.

All our products are calibrated.

LIGHT&CLEAR Collection materials offer a superb transparency, so that smart illumination will create an exquisite atmosphere both for private and public spaces.

LIGHT&CLEAR Collection complies with the highest standards in terms of:

- weight for special applications
- open fire resistance coefficient (no smoke and burning particles)

INSERTS

Our staff can:

- inlay between stones different materials as Gold(imitation or real), Silver , Stainless Steel, Brass, Copper, ammonites with diameter between 4-25 cm, etc.
- apply PURE GOLD 23K, Swarovski crystals in any shape, color and dimensions, pearls, etc.

SERVICES

Every project presents a diverse set of challenges and opportunities. No matter the project size or budget, our experienced professional design team is dedicated to providing the service, value, and innovation that our clients expect.

We also understand every client has unique needs associated with their designs and architectural projects. For this reason we specifically tailor our services to best serve the client, while bringing the full range of our experience to the project – from technical expertise and design innovation.

Our knowledgeable multi-generational staff of architects, designers, and technicians can provide complete architectural services as the project demands including but not limited to:

- Several of various stereotomy projects .
- Design and technical solutions .
- We offer a great team of consulting engineers, designers, architects, technicians with over 25 years of international experience .
- Restoration

SPECIAL ENVIRONMENT

We are able to produce more materials resistant for outdoor use that are recommended for Yacht manufacturing industry but also for exterior decorations, swimming pools, facades, terraces and garden furniture, spa centers etc.

These stones can be an extraordinary offer for outdoor design, thanks to technical characteristics:

- exposure temperature: $-20^{\circ}\text{C} \sim +140^{\circ}\text{C}$ / $-4^{\circ}\text{F} \sim +284^{\circ}\text{F}$
- resistant to UV atmospheric factors
- seawater resistant
- it can be installed both horizontally and vertically
- color selection suitable for outdoor use.
- inexistent curvature

jasper desert - **resistant to UV**

SPECIAL SURFACES

petrified wood black glossy

petrified wood brown leather finish

quartz crystal with two identical faces, both polished, 9 mm/0.35in thickness

- Polished
- Glossy but Honed (matte gloss)
- Leather Finish (brushed), even antislip
- We can make slabs or tiles with two identical faces, both polished

quartz white leather finish

petrified wood brown leather finish

quartz hematoid crystal with two identical faces, both polished, 9 mm/0.35in thickness

CUSTOM PRODUCTION

Maer Charme can provide all sizes from small up to 315x185cm/124x72in. Our company can produce any dimensions on customer's request. We can provide pieces according to the project, custom made and special design (leaves, flowers, butterflies, dragons, etc). This means there is no material loss, the price includes only the required surface and no scrap.

We produce optimal sizes, to minimize losses on cutting, for each individual project.

Execution standard thickness is 2 cm, but we can also produce other thicknesses: from 0.6cm up to 3 cm.
